History tells us about our past, now dead relatives, or unknown and famous people, and about their mistakes. If we don't learn from history, we will repeat the same mistakes they did. World War II cost at least 60 million lives. Why? The answer is simple! The German people made a mistake and over 33% voted for Adolf Hitler's party.

The Evolution of Cinema in Sweden

The Dernback Collection with slideshows is constantly growing.

Here are some categories of topics that appear in the slideshows.

There are probably few collections where only one private person has made 1,890 slideshows available on the Internet and where the subject is history, as well as in Swedish and English. Payhip is a service similar to an e-commerce store and only 6% of 1,890 items have a price and that

is 96% which is free. Not entirely unreasonable in light of the fact that the collection took approximately three full working years to create. The collection is also still growing.

Strange but only 1% of visitors download from this unique collection. Please increase the pace!

Bildspel att ladda hem

Dernback Collection med bildspel växer ständigt. Här är några kategorier av ämnen som visas i bildspelen.

Troligen är det få samlingar där bara en privatperson har gjort 1 890 bildspel tillgängliga på Internet och där ämnet är historia, samt på svenska och engelska.

Payhip är en service som liknar en e-handelsbutik och bara 6 % av 1 890 objekt har ett pris och det är 96 % som är gratis. Inte helt oskäligt mot bakgrund av att samlingen tog ungefär tre hela arbetsår att skapa. Samlingen växer dessutom ännu.

Märkligt men endast 1 % av besökare laddar hem från denna unika samling. Öka gärna takten!

År 1637 seglade två skepp från Sverige mot Nordamerika för att grunda en svensk koloni vid Delawareflodens utlopp. Kolonin, som fick namnet Nya Sverige, etablerades 1638 efter markköp från Lenapefolket och varade fram till 1655 då den togs över av Nederländerna. Under denna period var kolonin en del av Sveriges försök att expandera sin globala närvaro och handel.

The prehistory of Australia is the period between the first human habitation of the Australian continent and the colonisation of Australia in 1788, which marks the start of consistent written documentation of Australia. This period has been variously estimated, with most evidence suggesting that it goes back between 50,000 and 65,000 years. This era is referred as prehistory rather than history because knowledge of this time period does not derive from written documentation. However, some argue that Indigenous oral tradition should be accorded an equal status.

A hunter-gatherer lifestyle was dominant until the arrival of Europeans, although there is evidence of land management by practices such as cultural burning, and in some areas, agriculture, fish farming, and permanent settlements. The earliest evidence of humans in Australia has been variously estimated, with most agreement as of 2018 that it dates from between 50,000 and 65,000 years BP

THE FAIRY TALES OF HANS CHRISTIAN ANDERSEN THE REAL PRINCESS

THERE was once a prince who wished to marry a princess; but he wanted her to be a real princess. He travelled all round the world to find such one, but there was always something wrong. Not that there was any lack of princesses, but as to whether or no they were real ones, he could not always make out. There was sure to be something in the way that was not quite satisfactory. At length he returned home, quite out of spirits, for he wished so to find a real princess.

minocent, non-compatant civilians who were murdered by their own governments during the 20th century. Rummel stated that his 272 million death estimate was his lower, more prudent figure, stating that it "could be over 400,000,000." Rummel came to the conclusion that a democracy is the form of government which is least likely to kill its citizens because democracies do not tend to wage wars against each other.

He summed up his research in Power Kills (1997). His other works include Lethal Politics: Soviet Genocides and Mass Murders 1917-1987 (1990), China's Bloody Century: Genocide and Mass Murder Since 1900 (1991),

Democide: Nazi Genocide and Mass Murder (1992), Death by Government: Genocide and Mass Murder Since 1900 (1994), and Statistics of Democide (1997). Extracts, figures, and tables from the books, including his sources and details regarding the calculations, are available online on his website. Rummel ansåg att det finns stark korrelation mellan demokrati och fred av de 353 krig som utkämpats sedan 1816 skulle inget ha stått mellan demokratier, vilket enligt kritiker mest beror på att "demokrati" inte har någon enhetlig definition.

The Time Machine is a science fiction novella by H. G. Wells, published in 1895. The work is generally credited with the popularization of the concept of time travel by using a vehicle or device to travel purposely and selectively forward or backward through time. The term "time machine", coined by Wells, is now almost universally used to refer to such a vehicle or device.

Emily Brontë

Agnes Mary Frances Robinson (1857 - 1944)

Emily Brontë (1818-1848) is best known for her only novel, "Wuthering Heights." She was born in Yorkshire, northern England, where her father was an Anglican curate. When Brontë was three years old her mother died of cancer. At the age of six she joined her three sisters briefly at the Clergy Daughters' School, where privations and abuse contributed to the deaths of two of them. Her elder sister, Charlotte, immortalized this terrible place in "Jane Eyre." In 1846 Emily Brontë, under the pseudonym Ellis Bell, published a selection of her poetry. In 1847 appeared her dark, gothic novel, "Wuthering Heights," with its Byronic anti-hero, Heathcliff. Brontë was shy, even reclusive, and never married. In the fall of 1848 she fell ill with inflammation of the lungs, probably due to rapidly-progressive tuberculosis, and died in December of that year, aged twenty-nine. This is a short biography of Brontë written by the British poet, novelist, and critic, Agnes Mary Frances Robinson (1857-1944). (Pamela Nagami)

JOHN BULL

John Bull is a national personification of the United Kingdom in general and England in particular, especially in political cartoons and similar graphic works. He is usually depicted as a stout, middle-aged, country-dwelling, jolly and matter-of-fact man.

John Bull originated as a satirical character created by Dr John Arbuthnot, a friend of Jonathan Swift and Alexander Pope. Bull first appeared in 1712 in Arbuthnot's pamphlet Law is a Bottomless Pit.[2] The same year Arbuthnot published a four-part political narrative The History of John Bull. Starting in the 1760s, Bull was portrayed as an Anglo-Saxon country dweller. Bull is usually depicted as a stout man in a tailcoat with light-coloured breeches and a top hat.

Location Bengal and Orissa.
Period 1943–1944
Total deaths Estimated 2.1 to 3 million in Bengal alone

Bengal famine of 1943

British mis-government contributed to the crisis, but sees the policy failure as a complete misunderstanding of the cause of the famine. This misunderstanding led to a wholly misguided emphasis on measuring non-existent food shortages rather than addressing the very real and devastating inflation-driven imbalances in exchange entitlements.

The British government, this argument maintains, thus bears moral responsibility for the rural deaths

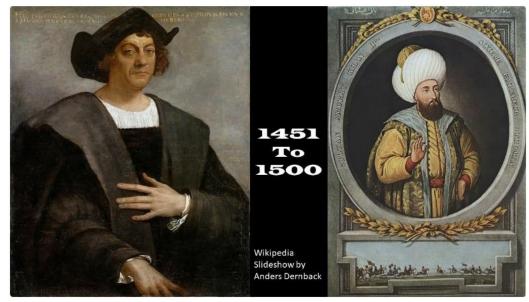

Working from an assumption that the Bengal famine claimed 1.5 million lives, the Famine Inquiry Commission made a "gruesome calculation" that "nearly a thousand rupees [£88 in 1944; equivalent to £3,904 or \$1,278 in 2019] of profits were accrued per death. As the Famine Inquiry Commission put it, "a large part of the community lived in plenty while others starved ... corruption was widespread throughout the province and in many classes of society" (Wikipedia info)

The Battle of the Allia was a battle fought c. 390 BC between the Senones (a Gallic tribe who had invaded northern Italy) and the Roman Republic. The battle was fought at the confluence of the Tiber and Allia rivers, 11 Roman miles (16 km, 10 mi) north of Rome. The Romans were routed and Rome was subsequently sacked by the Senones.
